**Alimentary Tract Pathology**

**IN-HOUSE**

**Participation Level : 100.00%**

**Annual Average : 13.00**

Run : 87W      **17**  
Run : 87WR     **14**  
Run : 89W      **10**  
Run : 89WR     **11**

**NEQAS**

**Participation Level : 100.00%**

**Annual Average : 6.75**

Run : 87V      **4**  
Run : 87VR     **8**  
Run : 89V      **4**  
Run : 89VR     **11**

**Key to Average Marks and Run Descriptions**

1. Average Mark 16-20: Immunocytochemistry generally of a high standard for the demonstration of the antigens in question.
2. Average Mark greater than 12 and less than 16: Immunocytochemistry generally of an acceptable standard for the demonstration of the antigens in question.
3. Average Mark between 10 and 12: Immunocytochemistry for some, or all, of the antigens in question requires further improvements. The laboratory should contact UKNEQAS-ICC for advice, particularly if this grade refers to "In-House" sections.
4. Average Mark less than 10: Poor Immunocytochemistry for the demonstration of some, or all, of the antigens in question. The laboratory should contact UKNEAS-ICC for advice, particularly if this grade refers to "In-House" sections.
